

The Art of Photography

Presented by longtime movie industry photographer Dale Robinette!

Whether you're a complete beginner, a novice photographer, or just love taking pictures, this class is for you! Each session will feature a screening and critique of your homework photos by your fellow classmates and instructor. During the term, you'll improve your skills in **composition, focus, exposure, action shots, lighting, portraiture, editing, and all the other bells and whistles** that can take your photography to the next level. This course is perfect for individuals looking to express their unique vision through their camera or phone while enhancing their foundational skills. Students will explore composition and lighting techniques as they relate to portraits, landscapes, abstract photography, and capturing those fleeting moments of truth. A digital camera or camera phone of any type is required, but no additional equipment is necessary-just your creative eye. Ages eight and up are welcome.
